

# KENWOOD

Listen to the Future

The Kenwood DT-7000S is a dedicated home tuner for playing SIRIUS satellite radio over a home entertainment system. With the SIRIUS subscription service, customers have access to over 120 streams of digital audio entertainment, including music, talk radio, sports and more. The DT-7000S offers advanced performance and installation features, such as optical digital output and RS-232 control, and practical user features, like stream search, preset profiles for multiple users, and storage/recall of song titles and artist names. A large 4-Line dot matrix display scrolls complete song title and artist information and the DT-700S has four nameable preset banks (20 stream presets each). Save and recall up to 24 song titles and artist names at the touch of a button and find channels fast with user-friendly dual jog dials. Digital and analog audio outputs connect to any home entertainment system and the RS-232C control input interfaces with advanced home control systems. The DT-7000S also comes with a full-function wireless remote control with discrete On/Off.
