

## EZ900

### Key Features and Lifestyle Solutions

#### All in one - Broadcast formats...

**Sirius Satellite Radio** – The EZ900 comes with a built-in Sirius Tuner. The built-in tuner provides added Satellite Radio features like, Parental lockout and Channel skip. The EZ900 also comes packaged with a Sirius Satellite Antenna. (Radio will not work without a Sirius Activation.)

**HD Radio** – The EZ900 also has a built in HD radio tuner. With HD radio, FM radio has CD like sound quality and AM radio will sound similar to current FM Radio. The firmware for this radio can be upgraded via the CD transport.

#### Compressed Audio...

**MP3** – Compressed music format. (The Most common.)

**WMA** – Window's Media Audio. Window's version of MP3 - Better sound quality and smaller file size.

#### Sound Quality Adjustments...

**Crossovers** – 4 Selectable front, 2 rear, High pass filters and 4 low pass crossover frequencies.

Optimize the output for any speaker system.

**System QEX** – Bass, Mid and Treble adjustments have selectable center frequencies and the Bass and Midrange have a Q adjustment. This feature is great for fine tuning a system!

#### System Building...

**Three Pre-amp outputs** – Front, Rear and Subwoofer out-puts. There is also 50 watt x 4 of internal power.

#### Lifestyle systems...

**Easy to use** – Like the other EZ radios, the EZ900 is designed to be simple to operate with few buttons and large volume and tuning knobs.

**Anti Theft** – The face detaches and there is a 4 digit security code to deter theft.

**Auxiliary in-put** – RCA in-put supports portables, games...

**External Media Control** – Kenwood's optional IP500 iPod interface connects to the EZ900 and offers iPod control through the EZ900.
